

Website Design and Implementation

CPTR204

Final Project (35 %)

Due Date: December 2, 2020

The following should be completed in your assigned groups. **Do question 1 and select either question 2 or question 3.** Ensure that each project has all of its contents compiled in a single folder, compile the projects and zip as one document.

1. Create a website for your favorite social or academic university club. The website should have at least 4 informational pages.
 - a. Home Page
 - b. About the Club
 - c. Club Members
 - d. Contact
 - e. Any other pages that you choose.

2. “On The Limb” is an exercise site for students. This site can be a single page (SPA) or Progressive Web App (PWA) website but design is a critical component to getting user engagement.

The site should have content about different exercises that can keep students fit during their tenure. The site should also recommend events that students can participate in to increase or maintain fitness.

You are free to add your creativity!

3. “The Vine” is a blogging platform which allows students to post their thoughts about their student experience. The home page should feature the latest blogs and a list of all

the most recent blogs. Each blog teaser should be clickable and should go to a well designed and laid out page that has the details of the selected blog.

You are free to add your creativity!

Grading Scheme:

- Functionality (40%)
- Design (30%)
- Completeness (15%)
- Code Quality and Project Structure (15%)
